APTREDLIGHT

OEM / ODM manufacturing partner for red light therapy brands

APTREDLIGHT is a Shenzhen-based OEM/ODM manufacturer of red light therapy panels, masks and flexible product platforms. We support brand-led product briefs, sample verification and model-specific sourcing discussions for projects in the US, UK, Europe and Australia.

Product and project scope

Panel platforms including T300; portable formats including A13; LED masks; flexible mats and blanket/bag platforms including 3050 ULTRA. Exact model, configuration and commercial availability require project confirmation.

Customization discussion

Define branding, housing/color, control interface, light configuration, labels, manuals, packaging and accessories against the selected platform. Engineering changes, validation scope, MOQ, costs and timing are agreed in the written project offer.

Evidence for your supplier review

Request exact-model photographs and drawings, controlled specifications, optical measurement conditions, applicable document scope, sample acceptance criteria, traceability and change-control arrangements. Factory area, capacity, available wavelength configurations and performance values should be confirmed for the project; no universal value is asserted on this card.

From brief to repeat supply

Define the brief → Review configuration → Evaluate samples → Agree verification and release → Check shipment and repeat-order changes. This is a proposed procurement workflow; actual responsibilities and checks are confirmed with the project team.

Company name for contract review

Hongguang Bio-Phototherapy Technology (Shenzhen) Co., Ltd.

弘光生物光疗科技（深圳）有限公司

Company name supplied for commercial discussions. Confirm the contracting entity against the quotation and business documents before an order. Target-market discussions do not imply regulatory authorization, and document coverage is model-specific.
